DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 and 6-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Sukegawa (U.S. Pat. No. 5,812,814).

Regarding claim 1, Sukegawa discloses a semiconductor memory device (figure 1a), comprising: a first chip (flash EEPROM chip 101) adapted to generate a first ready/busy signal (R/B signal), the first ready/busy signal indicating the first chip is busy; and a second chip (flash EEPROM chip 102) adapted to generate a second ready/busy signal (R/B signal), the second ready/busy signal indicating the second chip is busy; where the first ready/busy signal is distinct from the second ready/busy signal (col. 4, lines 23+).

Regarding claim 2, Sukegawa disclose the semiconductor memory device having all of the limitation as of claim 1 where the first chip (flash 101) is adapted to operate responsive to a first chip enable signal (chip select signal CS1); and where the second chip (flash 102) is adapted to operate responsive to a second chip enable signal (chip select signal CS2).

Art Unit: 2818

Regarding claim 3, Sukegawa disclose the semiconductor memory device having all of the limitation as of claim 1 where the first and second chips are adapted to operate responsive to control signals from a host (memory chips in the device response to control signals from a host system; col. 4, lines 23+; col. 5, lines 18+).

Claims 6-8 claiming the similar limitation as previously discussed in claims 1-3.

Therefore, they are analyzed as previously discussed with respect to claims 1-3.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

5. Claims 4-5 and 9-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sukegawa (U.S. Pat. No. 5,812,814).

Regarding claims 4-5 and 9-10, Sukegawa discloses the semiconductor memory device having all of the limitation as of claim 1. Sukegawa further discloses a third chip (flash EEPROM chip 103) connected in parallel with the first chip (flash EEPROM chip 101); and a fourth chip (fourth EEPROM chip 104) connected in parallel with the second chip (flash EEPROM chip 102) but fails to disclose wherein the first ready/busy signal R/B indicates the third chip is busy; and where the second ready/busy signal indicates the fourth chip is busy; and wherein the third chip is adapted to operate responsive to a first chip enable signal; and where the fourth chip is adapted to operate responsive to a second chip enable signal. However, each control signal for controlling only one memory chip in the device or controlling plurality on

memory chips in the device. It would have been obvious matter of design choice to have the control signal to control only one memory chip or plurality memory chip in the device, since applicant has not disclosed that particular purpose and it appears that the invention would perform equally well for only memory chip or plurality memory chip.
